PROJECTS

CDS-ICDP

- Cloud Data Studio - Intelligent Cloud Data Platform (ICDP) is a cloud native, accelerator platform, designed to provide a suite of data solutions across various touchpoints in the data value chain. Clients can customize pre-built features to maximize value from data sooner and in a more secure & efficient manner.

MeatBeats (E-commerce)

- It is a web application developed to provide meat and fish delivery to the end user. Users can search shops nearby using the area pin code. And users can buy products as e-commerce applications. All order tracking and rider information available on the admin dashboard.

E-Learning (CodeFirst Academy)

- This project is a learning management application which provides training to job aspirants in the IT industry. Great user interface website and candidate management process implemented in current project. Candidate attendance system and training base project reports generated from admin dashboard.
